

## **INTERVIEW IOANNA SIOTROPOU (K Milios and SIA OE, GR)**

I have started getting involved in Educational Activities very early, because my family owns for many years a Private Vocational School.

For several decades were only Greeks. The last 15 years we had among our students young people coming in Greece from several Countries from Europe, Asia and Africa, just for studying. So our courses are both in Greek and in English.

Having students from different language, religious and cultural background, it was a challenge for us and for me to train them the best way.

If we had this project some years before we would have the chance to overcome more easily the difficulties we first faced during the multilingual and multicultural teaching.

We continue multilingual and multicultural training and I hope and wish that we will continue it in the future.

When we started it was something new for us. Now we have several years of experience and we are sure we can manage it with success.

We have not involved in teaching or training of migrants or refugees because our programmes are focused on Vocational Training only.

As we are getting involved in several EU projects I am sure we will get knowledge and experiences from the results of this project which will be very helpful to implement them.
